

Justouch[®] Fingerprint Verification SDK

Biometric industry technology
accumulation since 2000

MINEX III compliant
fingerprint algorithm

Qualified algorithm partner
for China's National ID
Card program

ISO/ANSI
Generator & Matcher

Justouch[®] Fingerprint Verification SDK is designed to

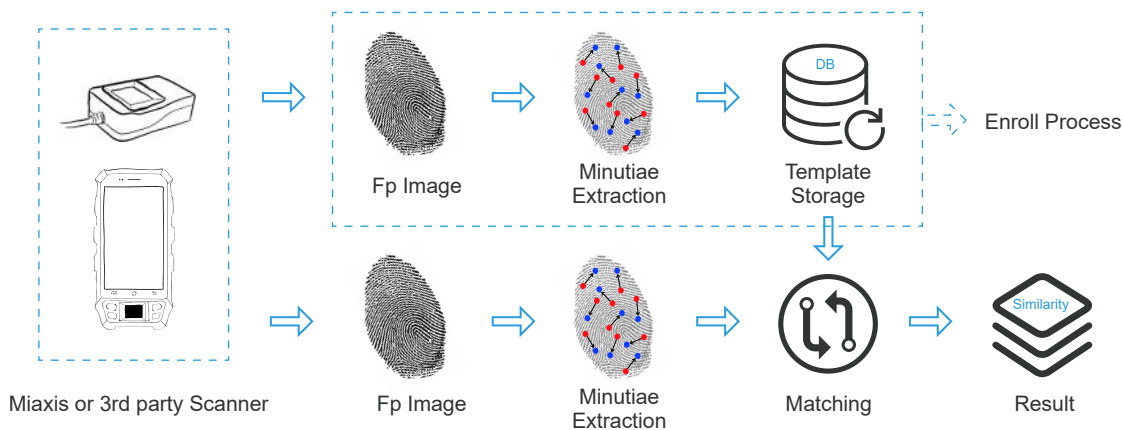

- Generate ANSI/INCITS 378 and ISO/IEC 19794-2 (2005&2011) compliant templates from an input fingerprint images
- Match ANSI/INCITS 378 and ISO/IEC 19794-2 compliant templates

Easy to integrate seamlessly into standard-alone fingerprint scanner and biometric integrated terminals from any brands for a broad range of identity verification via biometric data use cases.

»» FEATURES

- Biometrics standard, ANSI 378, ISO 19794-2
- MINEX III certified template generator with extraction speed ranked No.2
- Chinese government top 7 fingerprint matcher algorithm for 1:1 verification (1-to-many identification supported)
- Auto-activated SDK base Algorithm license
- Supports fingerprint images captured by 3rd party Scanners
- Multiple OS supported, Android, windows, Linux
- Customized SDK supported for other functions, latent rejection, live finger detection, image conversion tool etc.
